## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see pages 7 and 9, filed 20 July 2005, with respect to independent claim 1 have been fully considered and are persuasive. The previous rejection of claim 1 has been withdrawn.

### ***Allowable Subject Matter***

2. Claims 1, 3-7 and 22-29 are allowed over the Prior Art of record.

3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the independent claims 1, 22 and 25 is the inclusion of the limitations and/or method steps of a fluid analyzer and/or it's operation wherein a controller is coupled to a continuous heater film which generates a moving heat pulse in the heater film that moves down the heater film and a channel along therewith, such that the moving heat pulse is defined by a peak temperature with lower temperatures both downstream and upstream of the peak temperature. As to claim 27, the primary reasons for allowance is the inclusion of the limitations of a fluid analyzer including a channel having first and second heater elements thermally coupled to the channel, wherein the second heater element is downstream of the first heater element and has a length along the channel that is *less* (emphasis added) than the first heater element; and a controller that is coupled to the first and second heater elements wherein the controller heats the first heater element and at a predetermined time later, heats the second heater element. The Prior Art is devoid of an fluid analyzer and/or method steps of operation of a fluid analyzer having these particular details, which give rise to a moving heat pulse having the characteristics recited

Art Unit: 2856

within the claims, or the particular details of individual heater elements having the particular characteristics recited in claim 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
